<b>PPP</b>	Public Participation Process
<b>SAHRA</b>	South African Heritage Resources Agency
<b>LM</b>	Local Municipality

## 2. Introduction

The Public Participation Process (PPP) forms an essential part of the application process for environmental authorization, particularly in the context of the proposed mining activity in Kroonstad. It serves as a platform for individuals and communities to voice out their concerns and raise pertinent issues related to the proposed project. EMG Consultants undertook a comprehensive PPP to facilitate, engagement with stakeholders and identified Interested and Affected Parties (I&APs), ensuring that all relevant parties were adequately informed about the proposed project. Through various channels such as public meetings, stakeholder consultations, and information dissemination campaigns, EMG Consultants aimed to engage a wide spectrum of stakeholders, promoting transparency, and fostering dialogue.

By soliciting feedback, addressing concerns, and integrating stakeholder input into the decision-making framework, the PPP conducted by EMG Consultants sought to enhance the overall legitimacy and acceptability of the proposed mining activity. It underscored a commitment to responsible and sustainable development practices, acknowledging the importance of engaging with and considering the perspectives of all stakeholders involved. This inclusive approach contributed to fostering a collaborative environment for decision-making, promoting the interests of both project proponents and the communities affected by the proposed project.

Public participation must include.

*“Consultation with—*

-  *The Competent Authority.*
-  *Every State department that administers a law relating to a matter affecting the environment relevant to an application for an environmental authorisation.*
-  *All organs of state which have jurisdiction in respect of the activity to which the application relates; and*
-  *All potential stakeholders, landowners, land users, where relevant, registered interested and affected parties.”*

In accordance with the National Environmental Management Act (NEMA), the public participation process (PPP) offers individuals potentially impacted by a proposed development the chance to offer comments, voice concerns, and make suggestions aimed at improving the project's outcomes. Throughout the PPP, comments and issues raised are meticulously documented, evaluated, and recorded in a comments and responses register. Following a 30-day period, during which stakeholders can engage in the process, the identified issues are addressed and incorporated into the final project report. This comprehensive report, inclusive of stakeholder feedback, is then submitted to the decision-making authority, the **Free State Department of**

**Mineral Resources and Energy (DMRE)**, ensuring that community input shapes the final decision-making process regarding the proposed development.

## **2.1 Development locality**

The proposed mining activity is located 2.82km west of Kroonstad, within the administrative boundaries of the Moqhaka Local Municipality and under the jurisdiction of the Fezile Dabi District Municipality.

## **2.2 Project description**

Environmental Management Group (EMG) is submitting an application for Environmental Authorization (EA) on behalf of Moqhaka Local Municipality. This application seeks legal clearance for mining activities on an approximately 4.16ha Portion of the Farm Dorp Gronden van Kroonstad, located in the Kroonstad area. The property is owned by Moqhaka Local Municipality, a state entity.

The primary objective of this application is to legalize and permit the proposed mining activities, ensuring compliance with environmental regulations, thorough assessment of potential impacts, implementation of mitigation measures, and alignment with relevant policies and standards.

The proposed mining area is approximately 2.82km West of Kroonstad town. The proposed project focuses on the extraction of weathered dolerite material, which refers to dolerite that has undergone natural oxidation and weathering processes. This material is intended to support crucial infrastructure projects, particularly in road construction and stormwater maintenance in the Kroonstad area, aligning with broader developmental objectives.

## **3. Environmental authorisation process:**

Prior to the commencement of the proposed mining activity, Environmental Authorization in terms of the National Environmental Management Act (NEMA), 107 of 1998, as amended 7 April 2017 is required from the competent authority, Department of Mineral Resources and Energy (DMRE). The Environmental Assessment Process will be conducted in terms of the 2014 NEMA environmental impact assessment (EIA) Regulations, GNR 326 as amended.

According to the National Environmental Management Act (Act 107 of 1998) as amended 7 April 2017, Listing Notice 1 (NO. 327, 07 APRIL 2017) – R 327 the following activity applicable to this proposed project:

NEMA: Listing Notice 1 (NO. 327, 07 APRIL 2017)

 **Activity No. 21** - Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002).

(a) ) Associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource.

 **Activity No. 27** - The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation

Listed activity nr.	Listed activity description	Relevance to the project
<b>Listing Notice 1 (GN R 327, 07 April 2017)</b>		
Activity 21	Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), including-  (a) associated infrastructure, structures, and earthworks, directly related to the extraction of a mineral resource.	This application for environmental authorisation aims a mining permit under Section 27 of the Mineral and Petroleum Resources Development Act, 2002, to extract weathered dolerite material, also known as gravel material, for road maintenance and upgrading purposes. The project aligns with regulatory requirements and aims to uphold environmental standards while contributing to infrastructure development.
Activity 27	The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation	The proposed project will physically clear an approximate of 4.16 ha of indigenous vegetation.

## 4. Timeframes

### 4.1 Basic Assessment report timeframe/s

Process steps (in accordance with chapter 6 of GN R326)	Responsible Party	Timeframe
Initial communication to clarify the application with the Authorising Department.	EAP	1 day
EAP to conduct a site investigation	EAP	1 day
EAP to submit Application for Environmental Authorisation to the competent authority.	EAP	1 day
Competent authority Accepts Application.	Competent authority	14 days
EAP to compile a Basic Assessment Report subjected to 30 days Public Participation Process.	EAP	90 days
EAP to submit Final Basic Assessment Report inclusive of comments to competent authority.	EAP	1 day
Competent authority to grant or decline Approval for Environmental Authorisation.	Competent authority	107 days
Environmental Authorisation subject to 20-day appeal process.	EAP	20 days
Final Approval of Environmental Authorisation.	Competent authority	1 day

## 5. Maps

## 6. Approach and methodology.

The Public Participation Process was conducted as per GN R326 Chapter 6 Sections 39-44 of the Environmental Impact Assessment Regulations 2014 (as amended 07 April 2017) and the Public Participation Guidelines, 2017 were considered. Steps, which were taken to inform the identified I&APs and surrounding community of the proposed development included:

Newspaper advertisement.

Site notices

Distribution of background information document (BID)

## 6.1 Newspaper advertisement

Application advertised in the local newspaper the Kroonstad Advertiser on 9<sup>th</sup> of August 2024 (see below template).
